Information to all sailors about the TracTrac-units

The 2024 505 World Championship can be followed live (and also in replay-mode) on the internet from the event site at tractrac.com and in the 'TracTrac' app (iOS and Android) for mobile platforms. The races will be shown live in TracTrac on a screen in the Race Office and as a replay during aftersail. ([more info about how watch TracTrac here](#))

What you need to know

- The tracking units are to be collected each morning from 8.00 to 9.30 at the TracTrac-desk in Race Office.
- The unit is activated – no need to press buttons - and placed in an aquapac with a snap hook.
- The unit is identified by a 4-digit label. Make sure to collect the correct unit by checking the [list](#) (you will also find the list at the TracTrac-desk in Race Office).
- Every day you hand back the tracking unit for battery charging - as soon as possible after returning to harbour but within the protest time limit!
- Then it's time to relax and enjoy food and drink during aftersail and discuss the day's races with your fellow competitors.

IMPORTANT – PLEASE MAKE SURE TO COLLECT THE TRACKING DEVICE EVERY MORNING AND TO HAND IT BACK AGAIN AFTER RACING.

How and where the tracking unit will be mounted

- Please hook the unit under the foredeck using the snap hook on the aquapack – as high above the waterline as possible!
- In this position it will pose no obstacle to the boat handling.
- If the unit is placed too low it will not be able to send signals properly.
- The unit is waterproof so it's not a problem if the aquapack isn't.
- Please contact the tractrac officials at the race office if you experience any problems handling the unit or have any questions about the system.
